## Tom Weaver for US Congress, 5th District Massachusetts

We have a Constitutional mandate to "Secure the Blessing of liberty to ourselves and our Posterity." The current spending has created an unsustainable economic climate which will bankrupt the "Blessing of Liberty", robbing ourselves, our Posterity and the future of this great country. I want to reverse the spending. I want to remove the shackles of debt from us, our children, and future generations, and allow FREEDOM to catapult this great country to economic prosperity for everyone. Click [here](#) to view the US Debt Clock.

I believe in **limited government** with certain enumerated duties as defined by the Constitution.

I believe that a **balanced budget** with **lower taxes** and **less government spending** will cause an economic boom. I believe that financial independence from excessive taxation is the key to freedom.

I believe that **small business is the engine of job generation**. I believe that we must **remove the uncertainty of government involvement** and **reduce the overwhelming regulation and tax burden** on all small businesses.

I believe in **equal protection under the law**; that laws must be written for all Americans without regard to any differences.

I believe that **we are blessed to have the world's finest and all volunteer military** who risk their lives to protect our freedoms. We owe active duty members the best training and weapons available. We owe our veterans and their families the best medical and social services available.

I believe in using the **natural resources of this great country**, including oil, gas, coal, nuclear, wind, solar and American ingenuity to achieve **energy independence** while improving the environment.

I believe that **increased competition between private, charter and public schools** will improve educational opportunities and outcomes.

I believe that **we have the best health care system in the world**. Costs can be reduced by **tort reform** and increased competition.

I believe that **immigration laws should be enforced** and that immigration policies should be changed to expedite legal immigration without any form of amnesty.

I am **pro-life** and I recognize that we are a Nation of Laws. We should provide increased opportunities for adoption.

I believe that **marriage is between a man and a woman**. I believe that citizens of the individual states, not the courts, can make their own laws reflecting contracts and civil unions.

I believe that throughout the history of mankind, there are heinous acts against civilization and the life of man for which **the only just penalty for these heinous crimes, if convicted beyond a reasonable doubt, is death**.

I believe that **captured terrorists are entitled to military tribunals** as used effectively by past Presidents, including Franklin D. Roosevelt.

Paid for by the Committee to Elect Tom Weaver
